

# Proposed Metrics for COVID-19 Mitigation Policy: Escalation and Recession

# Metrics

	Recession Barrier	Escalation Barrier
Positivity Rate	Less than <b>5%</b> daily averaged over the most recent 28 days	Greater than <b>10%</b> daily averaged over the most recent <b>28</b> days
New Cases	<b>5</b> new cases per 100,000 residents daily averaged over the most recent 28 days	<b>10</b> new cases per 100,000 residents daily averaged over the most recent <b>28</b> days
THA Region/HRTS		

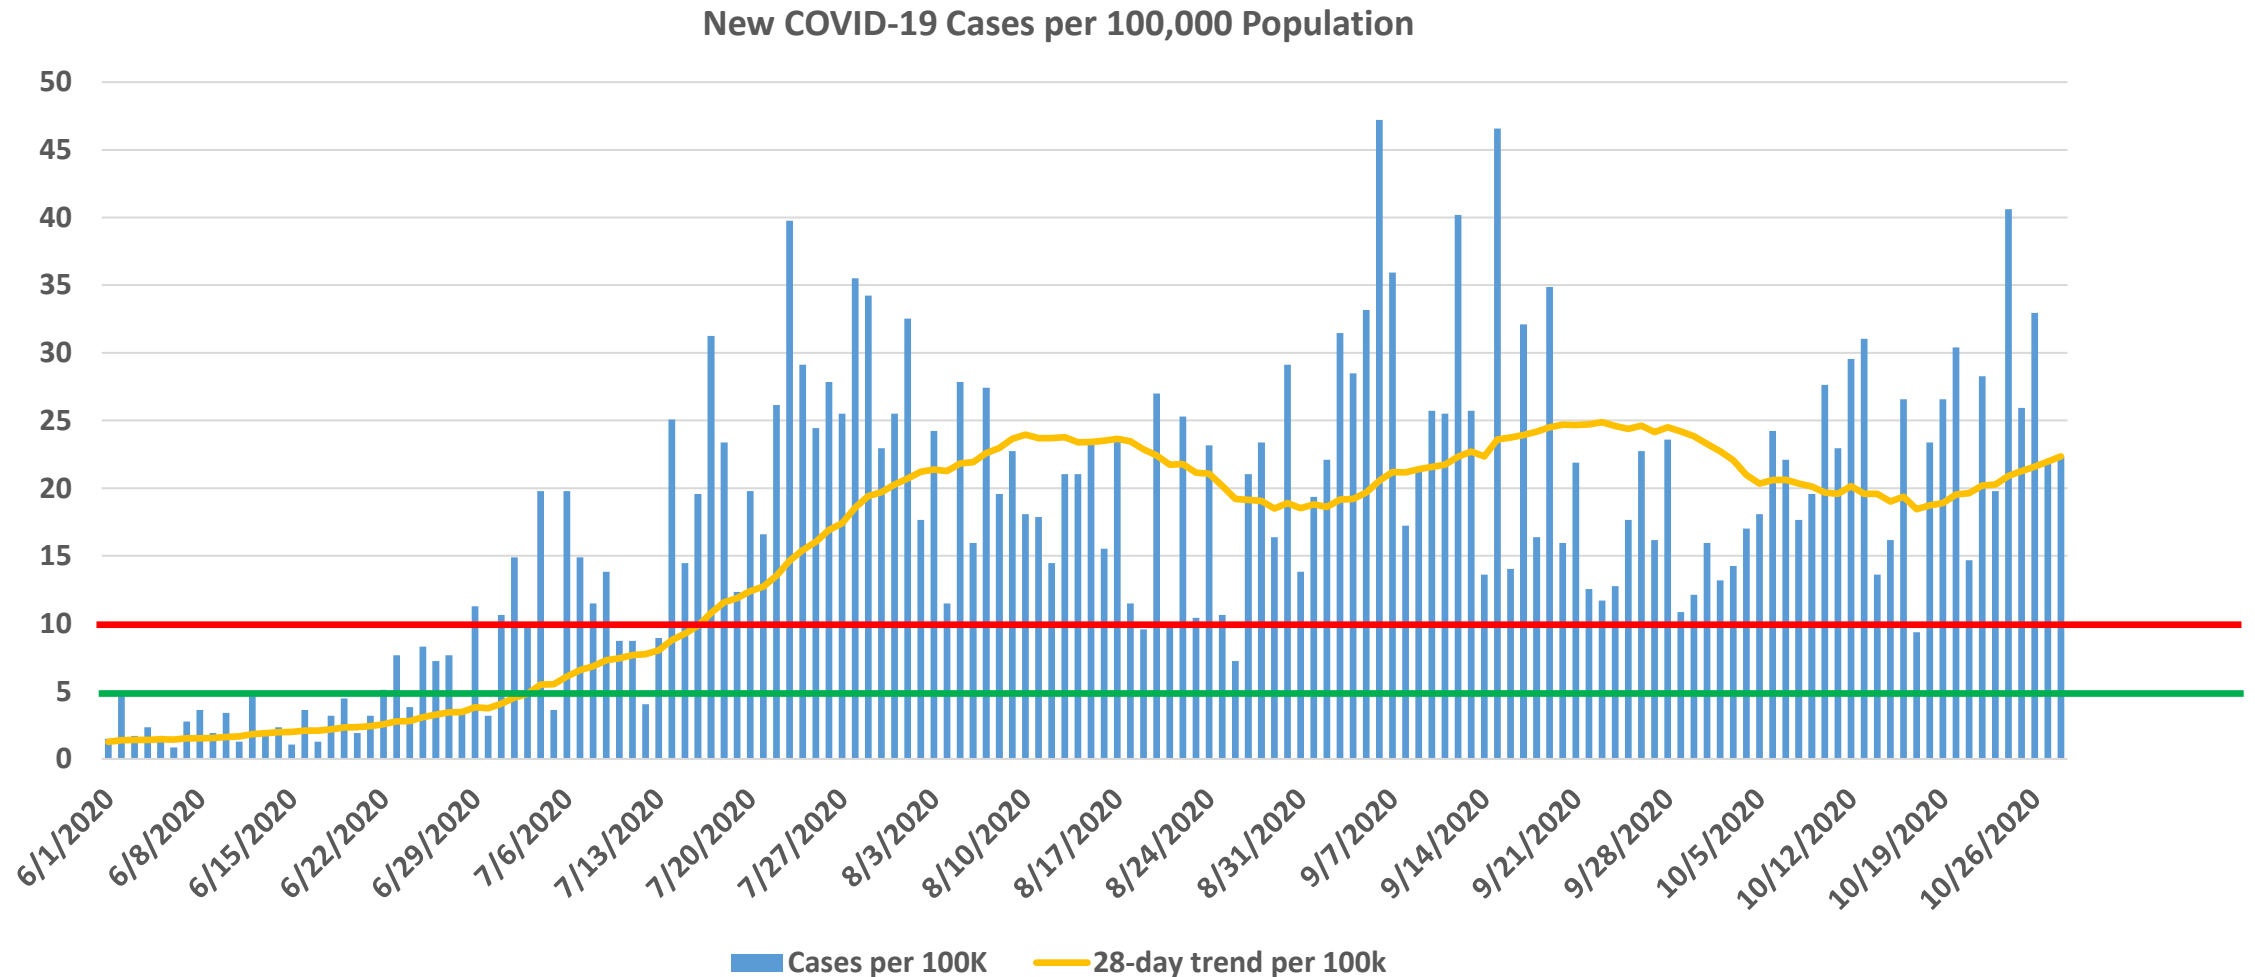

# Positivity Rate

- **Recession Barrier:** Less than 5% daily averaged over the most recent 28 days
- **Escalation Barrier:** Greater than 10% daily averaged over the most recent 28 days

# New Cases

- **Recession Barrier:** 5 new cases per 100,000 residents daily averaged over the most recent 28 days (this is an estimate of 23.5 cases per day)
- **Escalation Barrier:** 10 new cases per 100,000 residents daily averaged over the most recent 28 days (this is an estimate of 47 cases per day)

# THA Region/HRTS

Normal Hospital Operations

Normal Hospital Operations, High Patient Volumes

Normal Hospital Operations, High Patient Volumes that are Rising

Normal Hospital Operations, High Patient Volumes that are Falling

Normal Hospital Operations May Be Modified Due to Exceptionally High Patient Volumes
